EXPERIENCE

IT Support Technician

Oct. 2022 - Aug. 2023

Commander Submarines Atlantic | Norfolk, VA

- Managed the Computer Information Systems that supported the Submarine Conference of the Americas (SCOTA), collaborating with senior military officials and international counterparts to ensure secure communications
- Operated and maintained 50+ Apple and Motorola mobile devices for high-ranking officials, overseeing secure device management and multi-level access control to ensure confidentiality
- Provided IT support services to over 500 personnel, ensuring the functionality and security of hardware, software, and telecommunications systems used by senior U.S. Navy officials
- Managed scheduling, maintenance, and troubleshooting for Voice Telecommunication Systems, ensuring secure, uninterrupted communication during critical military operations

Information Systems Technician Submarines - Communications

Aug. 2018 - Oct. 2022

USS Helena SSN-725 | Norfolk, VA

- Restored and maintained 10+ critical servers and subsystems within the Common Submarine Radio Room (CSRR), supporting seamless communication operations during underway missions
- Oversaw the Key Management Infrastructure (KMI) system to safeguard cryptographic communication systems, ensuring the confidentiality of classified information
- Led complex IT support tasks for over 150 personnel, including system administration, network monitoring, and access management for secure networks (NIPRNet/SIPRNet)
- Completed over 10,000 hours of maintenance tasks to ensure mission-critical communication and network systems remained operational during submarine deployments
- Conducted day-to-day and complex ADNS communication operations in port and at sea utilizing over 15 radio communication methods at different radio frequencies

EDUCATION

Bachelor of Science in Computer Information Systems | California State University, San Marcos

Expected Graduation: May 2027

- Relevant Coursework: Computer Networks, Object-Oriented Programming, Machine and Assembly Programming, Abstract Data Structures and Algorithms, Operating Systems, Database Management, Web Programming, Computer Security, Computer System Analysis and Design
- GPA: 3.8
- Cybersecurity Club Member: Participating in hands-on cybersecurity labs covering network security, threat analysis and defensive techniques

Electronics Technician Radiomen School | United States Navy

Sep. 2019

- Trained to operate and maintain electronic equipment for detecting, tracking, recognition and identification, secure communication and Electronic Warfare
- Skilled in managing personal computers, auxiliary equipment, and Information Systems to support global telecommunications networks

CERTIFICATIONS

- CompTIA Security+ SY0-601 | Apr. 2023
- Top-Secret/SCI Eligibility | U.S. Department of Defense
- Awarded Two Navy and Marine Corps Achievement Medals | 2023 & 2021

SKILLS

- **Technical Skills:** C++/C, Oracle SQL, MIPS Assembly/Machine Code, SQL, Python, HTML, CSS, Java Script, Windows, Linux, Active Directory/Account Management, Key Management Infrastructure (KMI), NIPRNet/SIPRNet, Public Key Infrastructure (PKI), Vulnerability Scanning (ACAS, VRAM), Operational Security (OPSEC), SharePoint, Google Workspace, Microsoft Office Applications, Navy and Marine Corps Intranet (NMCI), Mobile devices, Secure Communications
- **Soft Skills:** Communication, Organized, Attention to Detail, Teamwork, Time Management, Adaptability, Critical Thinking, Leadership, Creativity, Problem Solving
